

# 60 SECONDS FOR A LIFE

## A NEW ERA: MORE ROADS. MORE PANTHERS.

The Florida panther is an isolated population of America's large cat also called pumas, cougars, and mountain lions. Once just a few dozen panthers survived, but the population has now grown to over 200 adults. Today, road kills are one of the leading causes of death.

## COMMIT TO JUST A MINUTE

Reduced speed nighttime zones exist where panthers are known to frequently cross roads. Panther activity is greatest between dusk and dawn when visibility is lowest. At the posted 45 mph speed, driving through a 3-mile-long panther zone only takes an extra minute compared to traveling at 60 m.p.h. Driving at this rate gives you more time to react - and save a life.

**2014-2019**

## GOOD FOR PANTHERS - AND YOU

The average cost of a speeding ticket issued in a nighttime panther speed zone often exceeds \$200 and excessive speeds require a mandatory court appearance. By driving the posted speeds you can also help our state's panthers and reduce your risk of personal injury and property damage.
